EXPERIENCE

Ernst & Young (EY) | GitHub | Live

May 2026 – July 2026

Agentic AI Intern

Gurgaon, India

- Contributed to an enterprise-grade AI dispute investigation platform for BFSI workflows, focusing on automated dispute intake, fraud analysis, evidence verification, and case routing, reducing manual effort by 40% and enabling real-time live notifications.
- Worked on multi-agent orchestration and intelligent decision-support flows to improve investigation efficiency by 35%, enhance response quality, and accelerate workflow automation across 1,000+ daily cases.
- Assisted in debugging, experimentation, and prompt refinement across LLM-based components, achieving 90%+ response accuracy for customer communication and analyst review.

Infutrix Technologies Private Limited

January 2026 – April 2026

Software Engineer Intern

Mohali, India

- Engineered full-stack features using Next.js, Express, Prisma, and PostgreSQL, reducing admin workflow overhead by 35%.
- Designed a recruiter distribution algorithm using FNV-1a hashing and Fisher–Yates shuffle for equitable candidate discovery.
- Integrated Razorpay payment gateways and JWT/Redis session caching, cutting authentication and checkout latency by 40%.

PROJECTS

CampusBridge – Smart Institutional Governance Portal

[GitHub](#) | [Live Demo](#)

- Built a full-stack portal using Next.js and Python that automates grievance intake, semantic triaging, and department routing, cutting resolution time by 40%.
- Integrated a Grok AI multi-agent pipeline for issue validation and urgency scoring, automatically filtering spam and lowering manual review effort by 50%.
- Designed role-based administrative dashboards across 10 departments with automated email notifications for transparent case tracking.
- Tech Stack:** Next.js, TypeScript, Python, FastAPI, PostgreSQL, Tailwind CSS, Grok AI and NextAuth.js.

TimeComplexityAI

[GitHub](#) | [Live Demo](#)

- Built an AI-powered algorithm complexity analyzer using Gemini/Groq API fallback architecture, intelligent caching, and an SEO-optimized responsive UI, reducing latency by 45% and serving detailed Big-O analysis with 90%+ accuracy.
- Integrated resilient fallback strategies handling 1,000+ daily queries with 99.9% uptime across high-traffic loads.
- Tech Stack:** Next.js, TypeScript, Tailwind CSS, Gemini and Grok AI.

EDUCATION

Punjab Engineering College, Chandigarh

August 2023 – May 2027

Bachelor of Technology in Computer Science Engineering

Chandigarh, India

- Relevant Coursework:** Data Structures and Algorithms, DBMS, Operating Systems (OS), Computer Networks, OOPS, ML, AI.

SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, HTML, CSS, SQL.

Frontend: ReactJS, Next.js, Tailwind CSS, Bootstrap, Zustand.

Backend: Node.js, Express.js, MongoDB, PostgreSQL, MySQL, WebSockets, JWT, REST APIs, Redis, Kafka.

AI/ML: NumPy, Pandas, Generative AI, LangChain, LangGraph, LangSmith, RAG, MCP, Vector Databases, Agentic AI, ML, Deep Learning.

Tools: VS Code, Jupyter Notebook, Postman, Git, GitHub, Docker.

CODING PROFILES

- Solved **2100+ coding problems** across platforms including LeetCode, Codeforces, CodeChef and GeeksforGeeks.
- LeetCode:** Solved 1180+ problems, achieved a maximum rating of **1874**, and earned the **Knight badge**.
- CodeChef:** Solved 158+ problems with a maximum rating of **1495**.
- CodeForces:** Solved 300+ problems with a maximum rating of **1067**.

ACHIEVEMENTS

- Secured **99 percentile** in **JEE Mains 2023** with AIR **12429** and AIR **14591** in **JEE Advanced 2023**.
- Participated in **PEC Winter of Code** open-source event across multiple projects.
